Abstract

This draft illustrates preparation of your paper using MS-WORD. All papers should be submitted as MS-WORD documents not exceeding to 8 pages. The abstract should not exceed 200 words and must precise the paper giving clear conclusions in 10.5 point. It should briefly summarize the essence of the paper and address the following areas without using subsections: Objective - briefly state the problem or issue addressed in language accessible to a general scientific audience. Method - briefly summarize the technological innovation or method used to address the problem. Results - provide a short statement of the results and findings. Conclusions - give brief concluding remarks on your outcomes. Detailed discussion of all these aspects should be provided in the main body of the paper. Authors are encouraged to refer the JScE manuscript template for manuscript preparation which is available at JScE homepage—INSTRUCTION TO AUTHORS.

Keywords: Up to 5 words must be carefully selected to facilitate reader's search separated by commas.

1. Manuscript Format Guidelines

The main body of the text will have a good introduction of the paper at the beginning. Simple language, short sentences and good use of section headings help to communicate information more effectively. Figures are important in aiding the clarity of the paper.

1.1. Type Area

The manuscript should be printed in A4 size paper with 25 mm margin on top and bottom and 20 mm on right and left.

1.2. Script

The manuscript must use Times Roman of 10.5 font size in English and 10.5 fonts in Nepali.

*Corresponding author: Name of an author
Affiliation of the corresponding author
Email: email of the corresponding author
(Received: Accepted: to be filled by the Editorial Board)

Adjust line spacing to accommodate 50 lines in the page. Hand written manuscripts will not be accepted. Number all pages starting with the title page. Please leave one blank space (10.5 pt.) between each of the following: title, author's names, address, and abstract.

All subsequent paragraphs should be indented as here with no line spacing between paragraphs. Two line spaces (10.5 pt.) should follow each section.

1.3. Title Page

The first page must contain the title of the paper, author full name (s), affiliation (s), position (s) and contact author's name, position, affiliation and mailing address, phone and fax numbers and email address.

1.4. Length

Papers should not exceed 8 pages length including figures, tables, endnotes and references.

1.5. Equations

Equations should be written in Equation Editor/Math Type, numbered consecutively beginning with (1) throughout the paper. The number should be enclosed in parenthesis and set flush right in the column on the same line of the equation. Example is shown below.

$$\sum_{e\in\delta^{+}(i)}\int_{0}^{T} f(e,\theta)\,d\theta = \sum_{e\in\delta^{-}(i)}\int_{0}^{T} f(e,\theta)\,d\theta. \quad (1)$$

1.6. Figures

Insert the figures in the text and arrange them consecutively in Arabic numerals, e.g., Fig. 1, Fig. 2 etc. Original figures should be included in the final submission. Make sure all type face in the figure is legible when reduced to the size for publication. Pictures should be in JPEG format. Sample has been shown in Fig. 1.

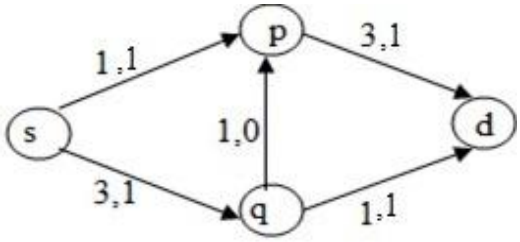

Fig. 1 Caption of the figure.

1.7. Measurements

International system of units (SI) should be used. If other units are used, equivalents should be given in parenthesis.

1.8. Tables

Insert tables in the text and number them consecutively in Arabic numerals, e.g., Table 1, Table 2 etc. as shown in Table 1 below.

2. Major Sections and Headings

Though, the organization of the body of the paper is at the authors' discretion, and may slightly be deviated according to the research areas; the only required sections are Introduction, Literature, Methods/ Procedures, Results, Conclusion and References. Acknowledgement (just before the Reference) and Appendices (just after the Reference) are optional. Each of the headings and subheadings should be numbered in numerals with bold-faced. The section headings will indicate hierarchy levels such as 2, 2.1, 2.1.1. Hierarchy of more than three is not preferred.

3. Citing References

References in the text should be quoted giving the last name of the author(s) and the year of publication of the reference in the following manner: Karanjit (2017) for single author, Khadka and Bhandari (2017) for two authors and Burkard et al. (1993) for more than two authors or (Karanjit, 2017) for single author, (Khadka and Bhandari, 2017) for two authors and (Burkard et al., 1993) for more than two authors respectively. The style should follow the examples as given in **Reference** Section. This section also provides example of referencing the book, proceedings, thesis and links.
